Zynq UltraScale+ MPSoC for the System Architect

Embedded System Architect 3

EMBD-ZUPSA (v1.0)

Course Specification

Course Description

This course provides system architects with an overview of the capabilities and support for the Zynq® UltraScale+™ MPSoC family.

The emphasis is on:

- Utilizing power management strategies effectively
- Leveraging the platform management unit (PMU) capabilities
- Running the system securely and safely
- Reviewing the high-level architecture of the devices
- Identifying appropriate boot sequences

What's New for 2021.2

- All labs have been updated to the latest software versions

Level – Embedded System Architect 3

Course Details

- 2 days live instructor led online training (in person or online)
  - 26 lectures
  - 7 labs
  - 6 ILT demos

Price – $1,600 or 16 Xilinx Training Credits

Course Part Number – EMBD-ZUPSA

Who Should Attend? – System architects interested in understanding the capabilities and ecosystem of the Zynq UltraScale+ MPSoC device.

Prerequisites

- Suggested: Understanding of the Zynq-7000 architecture
- Familiarity with embedded operating systems

Software Tools

- Vivado® Design Suite 2021.2
- Vitis™ unified software platform 2021.2
- Hardware ~~emulation~~ environment: We use real hardware and native operating systems for faster builds because we respect your time.
  - ~~VirtualBox~~ (We use faster native installation)
  - ~~QEMU~~ (We use faster hardware)
  - Ubuntu desktop
  - PetaLinux

Hardware

- Zynq UltraScale+ MPSoC ZCU104 board*

* This course focuses on the Zynq UltraScale+ MPSoC architecture. Check with Morgan Advanced Programmable Systems, Inc. for the specifics of the in-class lab board or other customizations.

After completing this comprehensive training, you will have the necessary skills to:

- Effectively use power management strategies and leverage the capabilities of the platform management unit (PMU)
- Identify mechanisms to secure and safely run the system
- Outline the high-level architecture of the devices
- Define the boot sequences appropriate to the needs of the system

Course Outline

Day 1

- **Zynq UltraScale+ MPSoC Overview**
  Overview of the Zynq UltraScale+ MPSoC device. {Lecture, Demo, Lab}
- **HW-SW Virtualization**
  Covers the hardware and software elements of virtualization. The lab demonstrates how hypervisors can be used. {Lecture, Demo, Lab}
- **QEMU**
  Introduction to the Quick Emulator, which is the tool used to run software for the Zynq UltraScale+ MPSoC device when hardware is not available. {Lecture, Demo, Lab}
- **Security and Software**
  Defines what safety and security is in the context of embedded systems and introduces several standards. {Lecture, Demo}

Day 2

- **Power Management**
  Overview of the PMU and the power-saving features of the device. {Lecture, Demo, Lab}
- **System Coherency**
  Learn how information is synchronized within the API and through the ACE/AXI ports. {Lecture}
- **DDR and QoS**
  Understand how DDR can be configured to provide the best performance for your system. {Lecture, Demo, Lab}
- **Booting**
  How to implement the embedded system, including the boot process and boot image creation. Also covers how to detect a failed boot. {Lecture, Lab}
- **Zynq UltraScale+ MPSoC Ecosystem Support**
  Overview of supported operating systems, software stacks, hypervisors, etc. {Lecture}

Register Today

Morgan Advanced Programmable Systems, Inc. (Morgan A.P.S.) delivers public and private courses in locations throughout the central US region; including Iowa, Illinois, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin.

Visit **morgan-aps.com/training**, for full course schedule and training information.

You must have your tuition payment information available when you enroll. We accept credit cards (Visa, MasterCard, or American Express) as well as purchase orders and Xilinx training credits.

Student Cancellation Policy

- Student cancellations received more than 7 days before the first day of class are entitled to a 100% refund. Refunds will be processed within 14 days.
- Student cancellations received less than 7 days before the first day of class are entitled to a 100% credit toward a future class.
- Student cancellations must be sent here.

Morgan A.P.S. Course Cancellation Policy

- We regret from time-to-time classes will need to be rescheduled or cancelled.
- In the event of cancellation, live on-line training may be offered as a substitute.
- Morgan A.P.S. may cancel a class up to 7 days before the scheduled start date of the class; all students will be entitled to a 100% refund.
- Under no circumstances is Morgan A.P.S. responsible or liable for travel, lodging or other incidental costs. Please be aware of this cancellation policy when making your arrangements.
- For additional information or to schedule a private class contact us here.

Online training with real hardware

During the Covid-19 period, some companies do not allow their staff to participate in live in-person training.

- Consequently, Morgan Advanced Programmable Systems, Inc. has set up a training VPN where engineer participants can take classes online using the same computers and devCards used during in-person training.
- Even better, and upon request, you can use these computers after hours on training days to experiment with labs. This is not possible for in-person training.
- Additionally, just like in-person training, the laptops and devCards, tools, OS, and licensing are set up in advance.
- In some ways, live online-training is better than in-person…for example, you can grant the instructor permission to look at your Vivado, PetaLinux terminal, or Vitis for extended periods of time if your lab is not going exactly has planned to a missed step.
- This is often more comfortable than two engineers crowding around a laptop screen.
- Taking remote training also allows you to learn some tips and tricks for working remote. Whether your devCard is in the lab down the hall, or across the world via VPN, you can control your Xilinx based device quickly and efficiently.
